

## ComfortFlex™ SPORT HARNESS

The ComfortFlex Sport Harness offers you and your dog only the highest standards of safety, simplicity and security.

Unlike many harnesses, the ComfortFlex Sport Harness is designed to protect sensitive areas, like your dogs throat and underarm, during any level of exercise. Due to the dynamic position of the leash connection, pressure is always directed directly to the chest, never riding up on the dogs throat. The simple yet effective design also lets your dog retain a full range of motion without having to worry about underarm irritation or chafing.

Getting your dog into this harness is incredibly easy. Just drop it over your dogs head, secure the Velcro strap around his girth and connect the safety snap. With very little practice, this can even be done with just one hand. Reflective Nylon strapping is easily seen in low light situations.

## ComfortFlex™ LIMITED SLIP COLLAR

The ComfortFlex Limited Slip Collar is designed to keep your dogs both safe and comfortable on their walks.

This easily adjustable, lightly padded nylon collar goes on loose, easily slipping over the dogs head. If the dog pulls in any direction away from you, the collar then tightens down enough so that the dog can not slip out of the collar, but not enough to choke the dog.

Reflective strapping makes this collar easy to see in low light situations. Machine Washable, Line Dry.
